Set of templates 3B (basic set)	400 080 0000
Further accessories on request	

### The classical machine for ring inside engraving – simple operation, precise results

The optimized classical Ringstar comes in a new design complete with stretching device as standard feature. Very small engravings or short names appear in a more beautiful face and are better to read. The stepless setting of the engraving size and stretching degree has also been optimized: it is very simple to do and has a clearly readable scale. The clamping pieces can easily be exchanged to hold wide rings up to 15 mm or specially shaped rings

### Delivery volume:

- Engraving machine Ringstar II
- Clamping pieces for rings up to 8 mm
- Template rail for 20 mm templates (can be replaced by template rails of other manufacturers)
- Replacement tension wire for ring movement
- 3 brass rings for practicing purposes
