

watch-master II

Watch testing unit for quartz watches

Elma Order Nos

watch-master II (230 V)	102 2803
incl. power supply	
watch-master II (115 V)	102 2804
incl. power supply	

Pictured watch-master II

For the use in after sale service centers, the watchmaker needs a test equipment, which allows to carry out all electrical test and measurements in a simple way.

The watch-master II offers all test measurement functions required for a skilled service diagnosis of quartz watches.

The functional layout of operating elements and the logical display of results and parameters greatly simplify the use of the equipment. The measurement process, largely automated, and the warning tone signaling a wrong operation make this tester very easy to be used by the operator.

Product features

- measuring of the rate accuracy
- measuring of the coil for short circuit, interruption and isolation
- integrated measuring of IC and total current consumption
- supply of variable voltage
- testing of watch batteries
- automatic or manual definition of measuring period
- acoustic alarm indicating wrong operation
- easy operation as all measuring is carried out automatically
- illuminated LCD graphic display

Technical Data

Outer dimensions of unit w/d/h (mm / inch)	220 / 150 / 140 / 8 7/10 x 5 9/10 x 5 1/2
Weight (kg / lbs)	2.0 / 4.4
Power supply	9 VDC
